- help create different events to entertain kids
- run different events such as Family Board Game Night
- work with kids to help them learn
- volunteer at least 3 to 4 times a month
You can find my volunteer spreadsheet here.

PROJECTS

Scratch Project — *Computer Science*
In 9th grade at DHS, my partner Matthew Kang and I had to create a Scratch project in Computer Science Principles. We decided to make a hybrid mini-game and story in scratch. Matthew and I decided to create a model the game of a student running away from school. The user can make decisions on whether they want to escape school or stay there. If the user decides to run away, it will turn into a game. From then onwards, the user has to use the arrow keys to dodge incoming school materials like pencils and pens.

SKILLS
- strong player in chess (1000+ rating)
- coding in various languages to create different products
- attending various hackathons

AWARDS
- Perfect Score on Math Olympiad
- 4.0 GPA up to date
- Algebra 2 w/ Trig, Advanced English, Biology w/ Research
- Won first in Decode Day Hackathon

EXTRACURRICULAR ACTIVITIES
- President of Math Tips and Tricks
- part of the Engineering Academy at DHS
- work with kids to help them learn
- play Badminton as my sport
